BEST PRACTICES

Publication: ,,Envibase''

The results of the project will be manifested through several applications to present the usage of enhanced infrastructure. Ultimately, Envibase aims for the common and enhanced usage of environmental data collected from multiple sources that is managed and shared with up-to-date solutions.

Re-use: WHIM App for smart phones

Whim is an alternative for car ownership. Every journey is covered by a monthly fee or pay as you go – whether it's taxi, public transport, a car service or a bike share.
It is an example of transport market re-using public information.
