

### Portal

- www.data.gov.gr launched in 2013
- Many regional and local portals

### Ranking

- Open Data Barometer Rank: #33
- Open Data Index Rank: #42

### Transposition PSI Directive

✓ Yes

Revised PSI Directive

### Open Data Policy

- Open Data, Open Access, Open by Default
- National 5 year strategy
- 12 priority domains identified
- Pre-defined approach to ensure data sets are up-to-date
- More than 5 events held annually

89%

### Licensing Norms

- Free of charge
- Open licensed
- Policy providing encourages to use CC licences

100%

### National coordination

- National guidelines on publication
- Many regional data initiatives
- Many regional portals integrated

92%

### Score Greece

Country (blue line), EU average (yellow line)

### Usability of portal

- API accessible
- Search data sets
- Download data sets
- ✗ Possibility to give feedback
- ✗ Contribute to portal

### Use & Reusability of Open Data

- 2,100 (0.02% of inhabitants) unique visitors on average per month
- 6% of the visitors are foreign
- Unknown proportion of traffic generated by humans
- Typical profile of visitors is a bit of everything
- Most data sets are available in XLS format
- 55% of the data sets are machine readable

2096 data sets available

50%

### Top data set & domains

- Most downloaded data set: Geospatial information of Kalamaria Municipality

Top 5 most consulted domains:

1. Geospatial
2. Statistics
3. Finance and contracts
4. Education
5. Gov. accountability and democracy

## Impact

## Best practices

- Decentralised administration of Crete:** Following national legislation, the decentralized administration issued the decision on the classification of the recorded data sets.
- Forest fires in Greece 2000-2014:** Data of the Ministry of Civil Protection uploaded on the national portal, was used by a citizen to map the hectares of forest area burned during recent years.

## Progress on barriers

- Two barriers existing for further publication, are addressed. To overcome the financial barrier measures were integrated to the overall fiscal policy of the country. National and regional events took place to further promote Open Data policies.
- Meetings were held to strengthen the importance of the re-use of Open Data.

- ### Major changes 2016
- Presence Open Data policy increased because policy encourages to use a standard license. The score for this indicator also increased due to the fact that there are many regional and local initiatives, of which many are integrated in the national portal.
  - The Use of Open Data has decreased, mainly due to a lower number of unique visitors per month compared to last year. Also, less data on the portal is machine readable although the number of uploaded data sets has increased significantly from 70 in 2015 to 2166 in 2016.
  - The Impact of Open Data remains the same.

## Print screen portal

The screenshot shows the data.gov.gr portal with a search bar containing "π.χ. Περιβάλλον" and several filter tags: "Περιβάλλον", "Δημόσια Διοίκηση", and "οικονομία". Below the search bar, there are statistics for data.gov.gr: 2k datasets, 120 agencies, 9 groups, and 1 related document. A "DATA" graphic and a "Welcome to Our New Website!" message are also visible.

## Maturity 2016

Classification maturity assessment 2015: Trendsetter

## Next steps

- Train the public authorities to increase their level of maturity
- Chase public administrations responsible for key data sets still missing
- Develop new features portal: applications and link to other portals

## Upcoming events

- No events communicated.
