

Hungary – Overview

Portal

- www.kozadat.hu
- Some sector specific portals

Ranking

- Open Data Barometer Rank: 65
- Open Data Index Rank: N/A

Transposition PSI Directive

Yes

Revised PSI Directive

Open Data Policy

- Less than 3 events held annually
- Open Data policy in place
- Pre-defined approach to ensure data sets are up-to-date
- No national 5 year strategy
- No priority domains identified
- <25% data uploaded automatically

Licensing Norms

- 100% free of charge
- No response to open licensed
- No policy providing a standard licence

National coordination

- National guidelines on publication
- All regional initiatives coordinated at national level
- N/A, no regional data initiatives
- N/A, no regional portals integrated

Score Hungary

Usability of portal

- API accessible
- Contribute to portal
- Search data sets
- No possibility to give feedback
- Download data sets
- >25% of datasets are machine readable

Use & Reusability of Open Data

- 25,283 (0.26% of inhabitants) unique visitors on average per month
- 6.5% of the visitors are foreign
- 93% of traffic generated by humans
- Typical profile of visitors is a bit of everything
- Unknown most available file format
- Data published by other administrations is re-used

>1800 data sets available

Top data set & domains

- Most downloaded data set: General information on public bodies

Top 5 most consulted domains:

- Government accountability and democracy
- Finance and contracts
- Health
- Social mobility and welfare
- Earth observation

Impact

Political:

- No activities launched since 2015 to monitor impact
- Unknown impact efficiency
- Medium impact transparency

Social:

- Unknown impact environmental sustainability
- Unknown impact inclusion of marginalised groups

Economic:

- No studies market value
- Unknown studies better service delivery
- No other studies
- Marginal (Zero) Cost Model

Barriers

Further publication

For further publication only one barrier exists.

- Other barrier:* Impact of the current system has not been reviewed in 2015/2016, as initially planned. Hungary has a working Open Data publication system since 2005, with an assessment of its efficiency to be conducted after 10 years.

Further use

For further use a financial barrier is present.

- Financial barrier:* Many data holders do not receive state funding, they must finance themselves from their data “selling”, which keeps re-use fees at a high level.

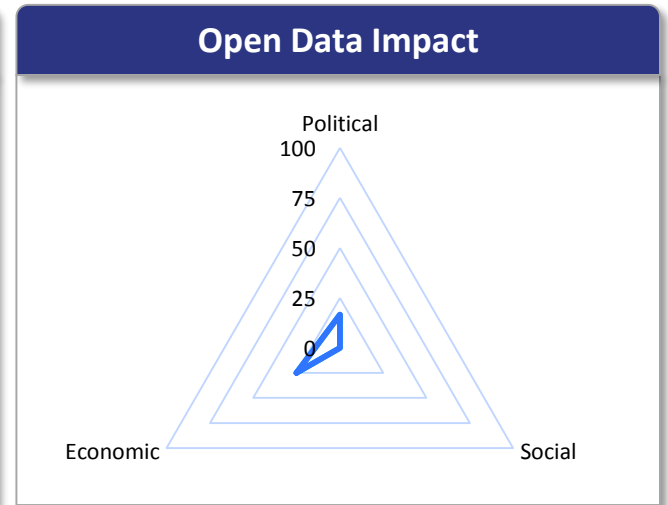

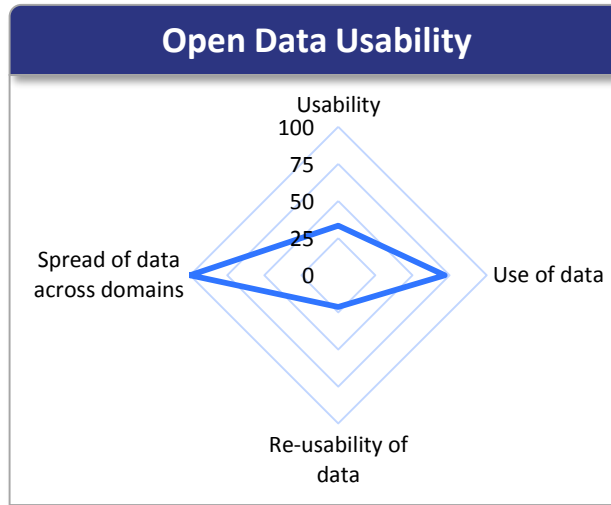

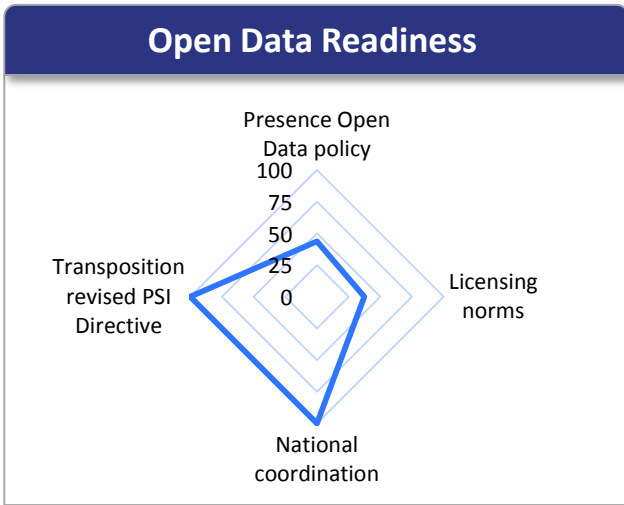

Best practices

- National legislation database: Free-to-access web based legislation database, based on the Official Journal’s core data. It helps citizens, enterprises and even public bodies in their everyday work/life.
- Centre for Budapest Transport: publishes public transport timetable database in GTFS format (free and public specialized format for timetables database).

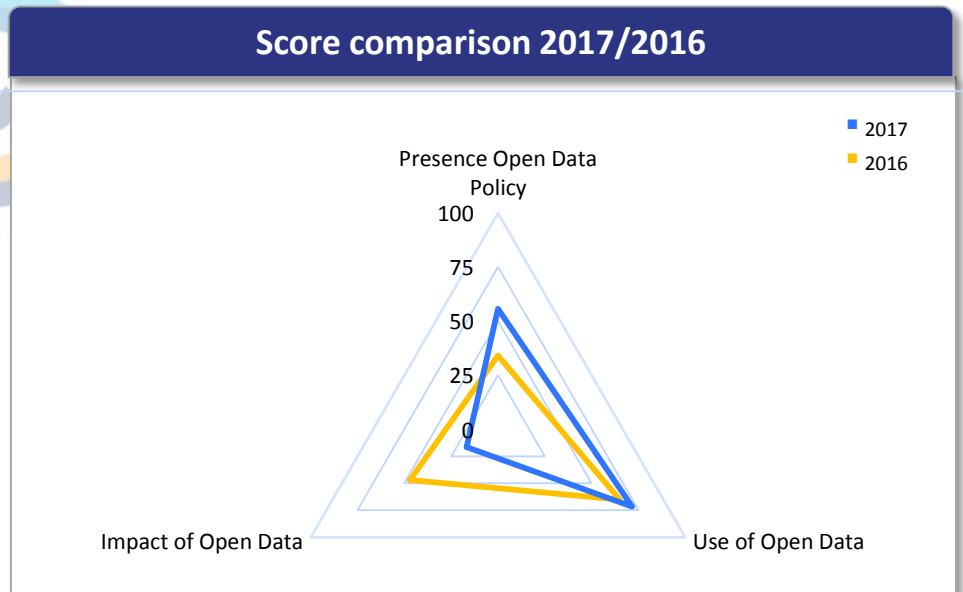

Progress on barriers

- Further publication: The PSI directive was adopted which includes several proposals. In 2017 the government will decide which proposals will be executed.
- Further use: The problem was assessed during the preparation of the white book/national data policy. Negotiations among stakeholders have begun, in order to decide how to solve the issue.

- ### Major changes 2017
- The Presence of an Open Data policy has increased, thanks to an Open Data policy being in place as well as a predefined approach to ensure data sets are up-to-date and improved national coordination.
 - The Use of Open Data slightly increased, thanks to more visitors going to the portal each month and more foreigners visiting the portal.
 - The Impact of Open Data decreased on both the political and economic impact indicators. The social impact is not measured.
