Usability portal

- ✓ API accessible
- ✓ Search data sets
- ✓ Download data sets
- ✗ Contribute to portal
- ✗ Possibility to give feedback

Use & Reusability Open Data

- 5,000 (0.06% of inhabitants) unique visitors on average per month
- 70% of visitors are foreign
- Unknown proportion of traffic generated by humans
- Typical profile of visitors is unknown
- Most data sets are available in Multiformat
- 99% of the data sets are machine readable

1197 data sets available

55%

Top data set & domains

- Most downloaded data set: Unknown

Top 4 most consulted domains:

1. Geospatial
2. Statistics
3. Health
4. Earth observation

Best practices

- No best practices provided by Switzerland.

Progress on barriers

- The political barrier for further publication will be addressed through activities planned to promote Open Data at a strategic level (i.e. new strategy "Digital Switzerland). Attract direct support from law makers is also envisioned as well as interconnecting data users and suppliers.
- Concerning further use, a "Round Table Open Data" will be launched to increase awareness amongst politicians, academics, and media as well as publishing more data and strengthening the role of offices who are domain experts (i.e. office of statistic) .

- ### Major changes 2016
- Switzerland launched a new portal in 2016. The portal has many features, resulting in the increase of the indicator Use of Open Data.
 - Compared to last year, the score of indicator Impact of Open Data has increased due to the funding model that is known this year.
 - The score for Presence Open Data Policy has stayed equal compared to the score in 2015.
 - Priority domains are defined in a round table which is composed by representative of different stakeholders, both publishers and users.

Print screen portal

- ### Next steps
- Further expand the now portal, for example with a mechanism to facilitate and foster interactions
 - Automatic harvesting of portal of the city of Zürich
