 Company:	Plan4all
 Sector:	Government & Public
 Product / service:	Platform
 Type of data:	Open data
 Origin:	Czech Republic

**Description**

Plan4all is a non-profit organisation that aggregates large open datasets related to planning activities in different areas, including spatial planning, transport, urban planning, environment, tourism and farming. The organisation aims to sustain and further enhance results of research and innovation projects by, for example, conducting research and experiments and transferring the results of their activities into practice.

Benefits

-  Plan4all offers open data for re-use in research, development and business innovation in areas such as transport, smart cities, environmental planning and marketing.

**How open data is used**

-  Plan4all collects datasets about different planning activities, such as spatial planning, transport, smart mobility, geographic information systems (GIS), traffic modelling, environmental planning, marketing and communications and social media. This collected data is offered for re-use in research, development and business innovation.
