## Quick facts

 Company:	Politicoindex
 Sector:	Government & Public sector
 Product / service:	Website
 Type of data:	German election data, EP
 Origin:	Germany

## Description

Politicoindex is an open-source platform for political information that provides an open-source political information platform to track and inform voters. Voters can inform themselves about political activities and resolutions, make educated and informed decisions and create more transparency about politics overall. The platform summarises the promises and achievements of politicians. Moreover, the comparison between promises and performance can be filtered.

## Benefits

Politicoindex is focused on transparency and accountability of governments and individual politicians.

  

## How open data is used

Politicoindex combines data gathered from many sources all over the web to serve the public to have a better understanding of the elections landscape. Politicoindex connects with governmental open-source data and combines and analyses these datasets to create easy to understand information.
