Quick facts

 Company:	Tutiempo
 Sector:	Environment
 Product / service:	Website
 Type of data:	Meteorological data
 Origin:	Spain

Description

Tutiempo is a website that hosts several secondary websites, all providing weather and climate information both in Spain and globally. Tutiempo offers worldwide data such as 15-day forecasts and weather alerts, both historical and real-time data on solar eclipses and earthquakes, images from weather radars, air quality (Spain-only) and sea temperatures.

Benefits

Tutiempo offers a comprehensive and information-rich overview of meteorological data, climate actual and historical trends, and astronomy across the globe.

How open data is used

The data offered through the website is obtained from public sources, the most predominant of which is the national meteorological institute (AEMET). All information offered is free and openly accessible to anyone, as third-party advertising accounts for Tutiempo's profits.
